

REMARKS/ARGUMENTS

Claims 30-61 are pending. By this Amendment, claims 30-32, 34-38, 40, 42-45, 47-51, 53, and 55-58 are amended, and claims 59-61 are added. No new matter is added. Support for the claims can be found throughout the specification, including the original claims, and the drawings. Reconsideration in view of the above amendments and following remarks is respectfully requested.

The Office Action rejected claims 1-17 under 35 U.S.C. §102(e) as being anticipated by Sahota et al. (hereinafter "Sahota"), U.S. Patent Publication No. 2001/0056460. Based on the text of the rejection, it is assumed the Examiner intended to reject claims 30, 32-34, 36, 38-39, 41-44, 46-47, 49-50, 52-54, 56, and 58 over Shaota. The rejection is respectfully traversed.

Independent claims 30 and 38 have been amended to recite, *inter alia*, wherein a same string of the web-document provided to the terminal has a different token according to whether it is a markup or a non-markup. Sahota does not disclose or suggest such features, or the respective claimed combinations of independent claims 30 and 38.

Independent claim 44 has been amended to recite, *inter alia*, wherein the word parser includes an attribute parser configured to recognize at least one of recognize a name of an attribute or a value of the attribute. Sahota does not disclose or suggest such features, or the claimed combination of independent claim 44.

Independent claims 49, 57, and 58 have been amended to recite, *inter alia*, wherein the integral parser includes a word parser that extracts and separates tokens of the web-document supplied to the terminal regardless of a kind of a markup language used to compose the web-document by referring to the token table, and wherein the word parser includes an attribute parser configured to recognize at least one of a name of an attribute or a value of the attribute. Sahota does not disclose or suggest such features, or the respective claimed combinations of independent claims 49, 57, and 58.

Accordingly, the rejection of independent claims 30, 38, 49, 57, and 58 over Sahota should be withdrawn. Dependent claims 32-33, 39, 41-43, 44, and 46-47 are allowable over Sahota at least for the reasons discussed above with respect to independent claims 30, 38, and 44, from which they respectively depend, as well as for their added features.

See below for the discussion of dependent claims 36, 50-54, and 56.

The Office Action rejected claims 31, 40, 45, and 51 under 35 U.S.C. §103(a) as being unpatentable over Sahota in view of Mackie et al. (hereinafter "Mackie"), U.S. Patent Publication No. 2004/0054535. The rejection is respectfully traversed.

Dependent claims 31, 40, and 45 are allowable over Sahota at least for the reasons discussed above with respect to independent claims 30, 38, and 44, from which they respectively depend, as well as for their added features. Mackie fails to overcome the deficiencies of Sahota, as it is merely cited for allegedly teaching a comment parser, a markup start parser, an attribute

parser, and a parsed character data analyzer. Accordingly, the rejection of claims 31, 40, and 45 over Sahota and Mackie should be withdrawn.

See below for the discussion of dependent claim 51.

The Office Action rejected claims 35, 37, 48, and 55 under 35 U.S.C. §103(a) as being unpatentable over Sahota and Mackie in view of Chadha et al. (hereinafter “Chadha”), U.S. Patent Publication No. 2003/0184552. The rejection is respectfully traversed

Independent claims 35 and 37 recite, *inter alia*, if the contents of the element are not the parsed character data, reading data until an end tag appears. Independent claim 55 recites, *inter alia*, if the contents of the elements are not the parsed character data, determining whether an end tag appears. None of the applied references discloses or suggests such features, or the respective claimed combinations of independent claims 35, 37, and 55.

Independent claim 48 has been amended to recite, *inter alia*, wherein the integral parser includes a word parser that extracts and separates tokens of the web-document supplied to the terminal regardless of a kind of a markup language used to compose the web-document by referring to the token table, and wherein the word parser includes an attribute parser configured to recognize at least one of a name of an attribute or a value of the attribute. None of the applied references discloses or suggests such features, or the respective claimed combinations of independent claim 48.

Docket No. **HI-0189**

Amdt. dated November 20, 2007

Reply to Office Action of June 20, 2007

Accordingly, the rejection of independent claims 35, 37, 48, and 55 over Sahota, Mackie, and Chadha should be withdrawn. Dependent claims 36, 50-54, and 56 are allowable in view of their respective dependency on independent claims 35, 48, and 55, as well as for their added features.

CONCLUSION

In view of the foregoing amendments and remarks, it is respectfully submitted that the application is in condition for allowance. Favorable consideration and prompt allowance are earnestly solicited.

If the Examiner believes that any additional changes would place the application in better condition for allowance, the Examiner is invited to contact the undersigned attorney at the telephone number listed below.
